

Gather

One place for your congregation — the bulletin, the prayer list, the directory, the meal sign-ups, the conversations — in an app with your church's name on it.

Most church software asks a congregation to learn a system. **Gather asks nothing of them.** It is the app people open on a Sunday morning to find the order of worship, on a Tuesday to bring a meal to a family, and on a Thursday to ask the church to pray. Everything a member needs is one tap from the home screen — and everything a pastor needs to reach them is one message away.

WHAT YOUR CONGREGATION GETS

Bulletin & sermons

Sunday's order of worship, and every sermon to watch or listen to again with notes to take home.

Messages

One-to-one, groups, and church-wide channels. Photos, voice notes, replies and reactions.

Prayer wall

Requests the whole church can pray over, with updates from the person who asked, and an archive when prayers are answered.

Directory & families

Every member and household, with photos, phone numbers, birthdays — and how the families of the church are related.

Events & calendar

Everything the church is doing on one calendar, with RSVPs, who else is coming, and a chat on every event.

Sign-ups

Fellowship meals, worship treats, clean-up rotations and meal trains for families in need — filled in by the people, not the office.

Bible reading plans

Read together through a plan, with a conversation alongside it and a quiet nudge when the day's reading is waiting.

Care board

When a family needs a hand — a meal, a lift, a repair — the church can see it and pick it up.

Built for a real church, not a demo. Gather is in weekly use at Christ Church Boerne, where every one of these features was asked for by a member and shipped the same week.

WHAT IT COSTS

One price, billed monthly or yearly. No per-person fees, no charge when your church grows, and nothing taken out of your giving.

YOUR CHURCH	MONTHLY	PAID YEARLY	INCLUDES
Under 150 weekly attendance	\$149	\$1,490 (2 months free)	Everything on this sheet
150 – 600 MOST CHURCHES weekly attendance	\$399	\$3,990 (2 months free)	Everything, plus priority on new features
600+ or multi-site weekly attendance	\$699	\$6,990 (2 months free)	Everything, plus per-campus setup

Setting up costs \$2,500, once. Your church's name, colors and logo through the whole app; your directory imported; your first bulletin, sermons and events loaded; your staff trained; and the app published to the App Store under your church's own developer account.

HOW IT HAPPENS

- 1 Week one — we talk**
An hour on what your church actually does: your services, your groups, your rhythms. Nothing is configured yet.
- 2 Week two — your app takes shape**
Your branding, your directory imported from whatever you keep it in now, your calendar filled in.
- 3 Week three — your staff learn it**
Two short sessions: one for whoever posts the bulletin and announcements, one for your elders and deacons.
- 4 Week four — the congregation**
Invitations go out, the app appears in the App Store, and someone is on the phone on the first Sunday.

WHAT'S INCLUDED

- ✓ **Hosting, updates and push notifications** — new features reach every church
- ✓ **Your own database** — never mixed with another church's
- ✓ **Support next business day**, and a number to call on a Sunday
- ✓ **Your data is yours** — export it any time, keep it if you leave

WHAT ISN'T

- ✓ **Giving is linked, not processed** — it points at the processor you already use, so nobody takes a cut of your offering
- ✓ **Apple's developer account** — \$99/year, in your church's name
- ✓ **Features only your church needs** are quoted separately; anything that helps every church is free

A twelve-month agreement, then month to month · sixty days' notice to stop · your directory, photos and messages leave with you
